SUMMARY

Since the Fall of 2017, I have been a student in Computer Science at Sapienza University of Rome; in 2020, I graduated with my Bachelor's degree, and I'm currently studying for my Master's degree in Computer Science. Before that, while I was achieving my secondary school diploma in IT, I was a freelance web developer. I have a strong passion for video games and graphics, which is why I would like to work in this field. I often enjoy creating small projects in my spare time, which are publicly visible on my Github.
